Dane Rise, Winsley: Proposals following discussions with Wiltshire Council's Highways Engineer

Additional speed limit roundels

The proposed 20mph roundels on the carriageway are shown below. It is suggested that these be staggered rather than pairs placed together to increase the conspicuity and the number of times drivers see the '20' message.

The estimated cost for providing these road markings is £1300 including traffic management.

Crossing improvements

The provision of tactile paving and bollards to highlight the crossing (similar to that shown below) would be in the region of £2500.
