Additional Street Light request for White Horse Road

Six people (four households) have asked the Parish Council to consider the installation of an additional street light at the cul-de-sac end of White Horse Road.

There is no street light at the very end of the cul-de-sac, an unlit path then leads to the park (also unlit).

Requests for new street lamps must be made via the Local Highways and Footpaths Improvement Group.

The cost of a new standard street light is £3700 + up to £150/m ducting, depending on the length of ducting needed and closest electricity source.
(costs from the Wiltshire Council website https://www.wiltshire.gov.uk/highways-works-cost)

LHFIG could be asked to contribute funds.
