Highways Update – December 2025

20's plenty – The next stage is to apply through Local Highways & Footpaths Improvement Group (LHFIG) for a speed assessment. This costs £2500, with a possible 50/50 split in costs between LHFIG and Winsley PC. Wiltshire Council is currently amending the Speed Assessment Policy so this may be of benefit. Implementation costs for changing to 20mph are between £5k - £10k.

Winsley School Speed Survey - Wiltshire Council are compiling a feasibility report for the School, which should be available before Christmas.

Resurfacing works Winsley Hill - Monday 1st December to Wednesday 10th December from 19.00 to 06.00. Information about the D1 bus service is on the website & Facebook.

Speed Limit Reduction – Unitary Cllr White met with members of WHTAG who requested that the speed limit on Winsley Hill be reduced from 40mph to 30mph. He has drafted a letter supporting the PCs future request to LHFIG for the 50mph to 40mph speed limit reduction on the B3108 and the for a reduction from 40mph to 30mph on Winsley Hill. Addiitonal supporting could include information from the Residential Road safety survey from January 2019 and the B3108 comments from recent 20mph survey. The PC could consider other supporting evidence, e.g. letters from the Rugby Club & Hartley Farm etc, a letter from the local MP etc.

Pedestrian crossing - Comments received during the formal consultation will be reviewed. A report will be drafted and presented to the relevant Cabinet Member for a decision on how to proceed. A decision is likely early in the new year. Resurfacing works are planned for April 2026 along a section of the B3108 close to the pedestrian crossing point and these will be coordinated with the pedestrian crossing works as necessary.
