Would you like to be involved with Project Winsley Playpark?

Winsley Parish Council manages the playpark and is considering both short and long term projects to enhance the park for children and the wider community.

The cradle swings for younger children are worn and we're looking into replacements for these.

The gates into the park are very well used and the hinges are no longer working properly. We're exploring whether new hinges or new gates are the best solution.

To enhance the park, Councillors have agreed to plant three new trees, to explore the addition of a sail shade and to add an extra bench.

The Parish Council has made wildflower borders in the park and would like to look at enhancing opportunities to support nature in the park.

Councillors are also looking into whether to remove some of the surfacing under items of equipment, with advice from playground companies on where it is safe to do so.

Some of the equipment in the park is around 25 years old and it's sensible to start looking ahead to ideas for when equipment will need replacing.

If you'd like to give ideas and help with progressing the projects outlined above please get in touch: parishclerk@winsley.org.uk
